Criteria For Success:

Being able to support himself, his parents, and a future family, eventually owning a small business, and having financial stability without depending on unstable gigs.

Needs

- Spanish Interface
- Tasks that can be completed via smartphone
- Flexible deadlines

Values

- Family loyalty, hustle, independence, practical results over theory

Wants

- Quick-paying, short-duration tasks
- Simple instructions with visual examples
- Opportunities that don't require formal education

Fears

- Being scammed or not paid for his work
- Not understanding instructions correctly due to language barriers
- Wasting time on tasks that don't benefit him financially

Lila Thompson

age: 19

residence: Jackson, Mississippi, USA

education: High School Graduate

occupation: Retail Cashier

marital status: Single

"I don't need to have it all figured out—I just need to keep moving."

Lila works shifts at a grocery store in her hometown, spends free time on TikTok and gaming, and sometimes looks for ways to make extra money online.

Criteria For Success:

Gaining independence, saving enough money to move out, and finding something she's actually passionate about.

Needs

- Aesthetically pleasing and easy UI
- Tasks that don't require technical knowledge
- Fast feedback or rewards to stay engaged

Values

- Authenticity, freedom, fun, self-expression

Wants

- Gamified experiences
- Social interaction or community features
- Quick tasks she can do between shifts

Fears

- Getting bored quickly and quitting
- Being judged or feeling "not smart enough"
- Apps that feel overly complicated

Viktor Petrov

age: 46

residence: Novosibirsk, Russia

education: Master's in Computer Science

occupation: Senior Machine Learning Engineer

marital status: Divorced

"If you cannot measure it, you cannot improve it — but you can still break it."

Viktor is a man of structure, spending most of his day coding, reviewing datasets, and reading technical papers, with evenings dedicated to chess and quieter routines.

Criteria For Success:

Building robust, reliable systems that perform well across diverse real-world conditions — not just benchmarks.

Needs

- Clear, structured interfaces with minimal ambiguity
- Ability to access detailed, well-organized demographic breakdowns
- High-quality, consistent, and structured feedback
- Tools for dataset auditing and bias detection
- Asynchronous communication options

Wants

- Diverse participant pools for model validation
- Serious, committed testers rather than casual users
- Data transparency and reproducibility
- Systems that prioritize clarity over visual clutter

Values

- Precision, rigor, intellectual honesty, consistency, efficiency

Fears

- Hidden problems in his AI models going unnoticed
- Poor-quality or inconsistent data ruining results
- Miscommunication facilitated by vagueness
